# Central Kansas Educational Opportunity Center

### **CKEOC Outstanding Participant: Laura Branda**

cosmetology program in October of 2016.

We are so very proud to introduce one of our outstanding Participants of the Quarter, Laura Branda. Her association with CKEOC began at Salina Adult Education Center. Laura was among students that attended workshops offered by CKEOC in planning for college, choosing fields of study, and general life skills. Having the knowledge of CKEOC's

existence was key in knowing where to turn for help when she was ready to pursue a postsecondary education.

Laura graduated with her GED in December of 2012, and it was not until August of 2015 that she made a decision to enroll at the Academy of Hair Design in Salina. She remembered CKEOC's services from the presentation to the group at SAEC, and thus enlisted the help of CKEOC Advisor, Mary Dino. Laura stated, "Mary Dino made arrangements for a campus visit to Hays Academy of Hair Design/Salina, assisted with financial aid, admissions and enrollment, all of which was amazing. For me, personally, just the thought of applying for college was a little scary, and so I really appreciated having someone help me through the process who was always willing to work with my schedule and answer any questions I had. I can honestly say I couldn't have done this without her." She is expected to complete the

### **CKEOC Outstanding Participant: Laura Branda (cont.)**

Laura is such an inspiration when she talks about her college experience. She drives 40 miles to school one way each day, and says it is completely worth it. She claims, "It's definitely been a huge step out of my comfort zone. I'm shy by nature, so school always seemed daunting. I also never thought I was

smart enough for any kind of higher learning, and I'm glad to be proven wrong." She says it has been a positive experience for her so far and has helped her grow. She is looking forward to graduating and proving to herself that she can and did accomplish what she set out to do. Her ultimate goal is to become a licensed cosmetologist and work as a stylist in a salon, which will allow her to express her artistic abilities.

Laura currently works at Goddard Sawmill in Simpson, KS as a crate/pallet builder, when she is not attending school.

She is the second of 5 children and is very close to her family. They try to get together when they can and go fishing. In addition to her job and school, Laura helps her mother take care of her grandmother. She loves reading, drawing, and going to concerts.

Laura's final remark was, "I'm extremely grateful for the people who put their time and effort into helping me get to where I am today. I'm really blessed to have such a wonderful support system. Hard work definitely pays off, and I really feel that if I can do it, anyone can!"

June – August 2016 Page 3

# Outstanding Participant: Anna Matsokina

Anna Matsokina is truly an outstanding participant of the quarter! After completing her high school education in Russia, Anna found herself yearning to broaden her horizons by learning new languages and experiencing other cultures. It was this drive that eventually brought her to the United States. After living here for a couple of years, she made the decision to join the Army.

It was during her transition out of the army that Anna was first introduced to CKEOC. She was attending a briefing through the Soldier For Life Transition Assistance Program – a series of classes designed to help soldiers re-integrate themselves into civilian life – where she participated in a workshop delivered by CKEOC Staff. Anna is very passionate about building a better and safer environment and wanted to become a Civil Engineer. During this time Anna was already working

toward her end goal by attending classes at Barton Community College and Kansas State University, but had her sights on attending The University of California, Berkeley. She had researched Civil Engineering programs and found that UC Berkeley was ranked as having the top program in the country by US News and World Report. After the presentation Anna reached out to CKEOC staff to assist her with attaining her dreams. Through the provision of EOC services including help with admissions, transfer assistance and financial aid support she was able to accomplish her goals.

As one would expect, getting into such a high profile and selective program has its challenges. Anna had the grades she needed, but was concerned about writing the two required essays. Over the course of a month Anna met several times with CKEOC staff to receive assistance with writing her admissions essays. The end result was a success. When asked how CKEOC was able to assist her with her transfer, Anna explained "Ray helped in answering questions I had in regard to financial aid and also gave me valuable pieces of advice in editing my essays." Ultimately, Anna was granted admissions to the Civil and Environmental Engineering Program at UC Berkeley and started attending classes in September 2015.

When asked about her college experience, Anna indicated "It has been quite challenging but it is absolutely amazing. I am learning a lot every day and I also meet so many interesting new people: professors, other students, and also people like Ray who help along the way" She appreciates the help provided by CKEOC staff by adding "they are very nice people who are trying to improve other people's lives. They are very responsive and enthusiastic."

Anna has now settled into her new school and has built a routine. Because of the rigors of the program she has chosen not to work so that she can focus exclusively on her studies. Although she has a hectic schedule, she still finds time for recreation and spends her free time exploring new cities, enjoying the outdoors, attending musical performances and practicing yoga.

# Fort Riley Education Center Consortium Spotlight:

# KANSAS STATE

For this issue's Fort Riley Education Consortium Spotlight we are highlighting Kansas State University. We were able to sit down with Dominic Barnes, Military Student Services Coordinator for KSU's Fort Riley Office to discuss their offerings. Dominic indicated that he has two primary roles in his position. The first role is to provide support for the Airframe and Powerplant Review program on post. The second role is to provide advising and coordination for KSU Resources and be a point of contact for KSU's four campus locations: Manhattan, Salina, Olathe, and Global (online).

The Airframe and Powerplant Review Program is KSUs's sole program offering on Fort Riley. This is a program that is open to soldiers in specific Military Occupational Specialties (MOS) (Most of 15 series as well as 67H and 67G) and allows students to combine their job training with three classes provided by KSU to prepare and qualify them to take the FAA Airframe and Powerplant Certificate exam. After successfully completing the exam, the student will be certified to perform almost all repair and maintenance work on airplanes. As it usually requires a Bachelors's degree to be able to sit for this exam, the KSU's program offers eligible students a great benefit in allowing them to use their job training in lieu of classes to obtain their certification. The three classes that make up the program are: General Review, Airframe Review, and Powerplant Review. The classes can be taken in any order and are each 8 weeks in length, making the classroom training 6-7 months in length. In order for a class to be held there has to be at least 10 people signed up. This means that the training may take longer if there are periods where there is not sufficient enrollments to hold a class. To test for the Certificate the student also has to have the required on the job training. This can come before during or after the classes. Tuition Assistance (TA) provided by the Army can cover the majority of the cost of the classes.

Dominic explained that KSU is uniquely positioned as the only consortium member that has a main campus that is part of the local community. The proximity of KSU creates high local awareness on Fort Riley, which often leads soldiers and their families to visit his office in search of programs other than the Airframe and Powerplant Review Program. It is at this time that he provides pre-advising and coordination for programs available on the other campuses. He will talk to the student make sure that KSU has offerings that match their goals. K-State has partnered with community and technical colleges throughout Kansas to offer working professionals the opportunity to earn an associate degree locally and then a bachelor's degree online through the Global Campus." These agreements, called 2+2 Partnerships, exist with 24 community colleges in Kansas and with 5 community colleges outside the state. Colleges on Fort Riley that are 2+2 Partners are Barton County Community College, Hutchinson County Community College, and Central Texas College.

June – August 2016 Page 5

# **LPN & RN Pinning**

Barton Community College Nursing Department held their annual Nursing Pinning Ceremony on Friday, May 13th, at the BCC Fine Arts Auditorium. Among the recipients who graduated, were two CKEOC participants, Christina Delgadillo-RN and Morgan Kurtz-LPN. Liz Klima, CKEOC Academic Advisor, was in attendance to celebrate their accomplishments. **CONGRATULATIONS CHRISTINA AND MORGAN!!!!!** 

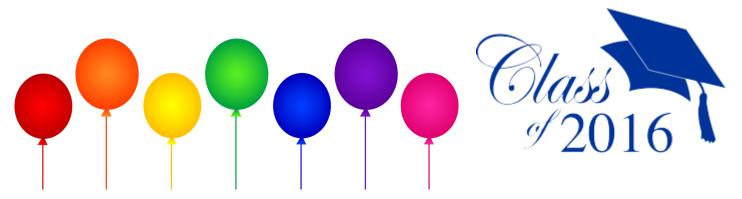

#### **Barton Center for Adult Education Graduates**

The Barton Center for Adult Education recognized its graduates at a ceremony held on Friday, May 13th at the Barton Community College Physical Education Building. Several of Central Kansas Educational Opportunity Center's participants were among the gradates.

# Congratulations on your achievement!!

#### Why Barton Natual Gas?

- Certificate and Degree programs
- Industry-driven program and curriculum
- Faculty and trainers directly from industry
- Technology-driven program; cutting-edge equipment
- Students recruited right out of the class room by industry; jobs readily available
- Hands-on training
- Paid internships available
- Student Field Trips to Kansas Pipeline Association Safety meeting, the Kansas One Call Meeting, the Kansas Corporation Commission Safety Meeting. Cashco, Ellsworth, KS a company that manufactures numerous control valves, relief valves and other equipment used in the hydrocarbon field. Northern Natural Gas, Bushton KS a natural gas compressor station.

There are many opportunities in the Natural Gas Transmission and Distribution industry for those with a strong technical background. Barton's program delivers hands-on training that helps you gain skills necessary for employment with minimal "on the job training" by the company.

Technicians are needed for corrosion control, gas measurement, instrumentation and electrical controls, pipeline construction, and programmable logic controller (PLC) programming.

The Gas Pipeline Tech program provides training in comprehensive gas industry technologies recommended by regional gas pipeline companies. A 35 credit certificate is available as well as a 64 credit AAS degree.

#### **About CKEOC**

The Educational Opportunity
Center is 100% funded by the
U.S. Department of Education
and is one of the TRiO programs.
TRiO began with Economic
Opportunity Act of 1964, in
response to the administration's
War on Proverty.

TRiO programs include eight outreach and support programs targeted to help disadvantaged students progress from middle school to post-baccalaureate programs.
