

ACE Reading

Goal: To provide a format for developmental reading students to master course competencies in an individualized classroom setting allowing students to work intensively in areas of weakness and to complete one or both levels of DE reading within one semester.

Format: The course competencies for both levels are organized into modules with objectives, assignments in text, assignments in MyReadingLab (online component), and anticipated deadlines. Students will initially take a diagnostic test on their reading skills and reading levels to ascertain their reading capabilities. Based on the diagnostic results, students will receive a personalized study plan to improve their reading skills and increase their reading level. Students receive individual help as needed and immediate feedback on assigned work.
