## Technical Accounting:

- 2 year Associate of Applied Science degree.
- Program is focused on accounting and payroll.
- Great starting point for non-traditional students.
- Prepares students for entry-level positions upon completion, but also can lead to a four-year degree.

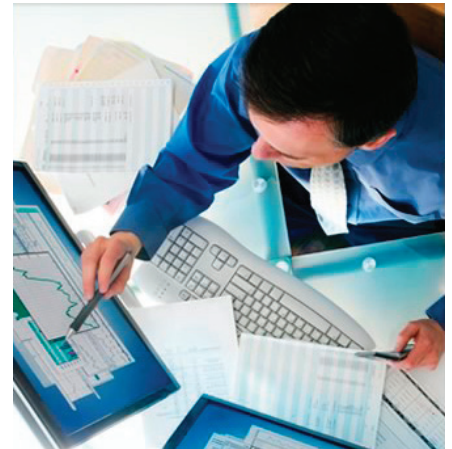

## Why Barton?

- Instructors will know student's names and learning goals.
- Employment focused program that will provide skills necessary to be successful in the workforce.
- Provides a diverse base of accounting and office skills which will allow graduates to work in various office settings.
- Capstone project allows students the opportunity to have interview practice; students will leave with a resume and cover letter that is ready to be presented to potential employers.
- Flexible course offerings: online, live, hybrid, ITV, and evening.

## Occupational Outlook:

- Bookkeeping, accounting, and auditing clerks held more than 2.1 million jobs in 2006 and are employed in every industry.
- Occupation ensures plentiful job openings, including many opportunities for temporary and part-time work.
- In May 2006, the median wage and salary earnings of bookkeeping, accounting, and auditing clerks were \$30,560. The middle half of the occupation earned between \$24,540 and \$37,780.
- Job growth is projected to be average through 2016, and job prospects should be good as a large number of bookkeeping, accounting, and auditing clerks are expected to retire or transfer to other occupations.
- Clerks who can carry out a wider range of bookkeeping and accounting activities will be in greater demand than specialized clerks.
- Demand for full-charge bookkeepers is expected to increase, for example, because they do much of the work of accountants and perform a wider variety of financial transactions, from payroll to billing.
- Technological advances will continue to change the way these workers perform their daily tasks, such as using computer software programs to maintain records, but will not decrease the demand for these workers, especially in smaller establishments.
