FACULTY RECOMMENDATION 2020 Research Methods I and Introduction to Research Application May 26, 2020 – July 22, 2020

The 2020 Research Methods I and Introduction to Research Application is an 8-week program that offers summer academic and professional preparation for recently graduated High School students and current community college students entering science, technology, engineering or math (STEM) fields. The program looks for students who genuinely possess the potential to prepare for and succeed in a college education in STEM fields. Your accurate and candid appraisal of the applicant will be closely examined during the student selection process. Additional pages may be included.
