Pre-Architecture

Emphasis of Study

Architects design buildings and other structures and are either self-employed or work for architecture firms, real estate developers, or governmental agencies.

A bachelor's degree program in architecture requires five academic years of study at most colleges and universities. By careful selection, you may obtain the first year at Barton County Community College. If you plan to pursue a bachelor's degree in architecture, you should be sure to consult the requirements of the college or university to which you plan to transfer. If you are interested in a bachelor's degree in architectural engineering, you should refer to the Pre-Engineering curriculum requirements.

The following is an example of the first year requirements of a bachelor's degree.

Associate in Science (Total Credit Hours - 64)

1 st Semester (Fall Semester)				
□ARTS	1214	Drawing I	3	
☐ ARTS	1202	Design I	3
