

Medical Transcription Certificate is Online!!!

Medical Transcribing is a career field for individuals interested in listening to dictated recordings provided by a variety of healthcare professionals, and then transcribing the information according to the appropriate format of the document. Fast, accurate, thorough individuals are needed in keying medical reports, correspondences for physicians; and creating reliable medical and legally defensible records. Such documents may include discharge summaries, history and physical examination reports, operative reports, progress notes, etc. Transcriptionists become experts in spotting mistakes and inconsistency in a medical report.

Barton offers a 33 credit hour online Medical Transcription program. Courses include a blend of medical and professional learning experiences.
