

Medical Administrative Technology Online Degree

Looking for a 100% online program in the medical field?

This could be the program for you! This is a career option for individuals interested in working in a healthcare field, but not interested in clinical or patient care. This degree provides a broad knowledge of the medical office including a blend of business and medical courses such as records management, customer service, medical terminology, and medical coding. Students who are passionate about attention to details and accuracy will thrive in this program!

Upon completion of this program, students will receive an Associate in Applied Science degree in Medical Administrative Technology from Barton Community College. After graduation, students will be prepared to work in places such as hospitals, clinics, surgery centers, doctor's offices, insurance companies, physical therapy clinics, or any other medical setting that requires administrative support!

Barton's Medical Administrative Technology program is currently open for enrollment to students. ALL courses are now online! Courses are offered in nine and seventeen week sessions during the fall and spring semesters and several courses are also offered in the summer session as well.

For further program information, please visit Barton's Medical Administrative Technology website at
