Computer Networking Specialist Certificate

The Computer Network Specialist Program prepares graduates to work as technical support specialists, an area of the computer industry that is currently experiencing unprecedented growth, change and opportunity. Networking specialists look into issues that computer users are having with either computer software or hardware and try to resolve the problem. This program will prepare the students to fulfill the role of technical specialist in the thriving fields of microcomputer support, microcomputer repair and local area network administration. This program will also help students to prepare for industry standard certifications.
