

Current Openings: **CNC II**

Custom manufactured hydraulic cylinders provide daily challenges at an industry leader with solid performance since 1967. The company provides a competitive base wage and benefits package including 11 paid holidays, 2 weeks' vacation after 12 months service, 401k with 25% match, and support for continuing education opportunities.

Must be able to read and understand written instructions, blueprints, and precision measuring equipment, and complete accurate calculations using shop math. Additional on the job paid training provided by the company on day shift. CNC II is a second shift position and will train on days 7:00am-3:30pm weekdays before going to evening shift 3:30pm-12:00am weekdays.

What are you waiting for?
