

Policy 1103 – Contingency Planning

In fulfilling its educational mission, Barton County Community College attempts to make optimal use of its resources. Optimum utilization may call for the adjustment of operational procedures such as a reduction or discontinuance of an academic program or department, or reallocation of resources as a result of changing educational priorities, shifting enrollment patterns, lack of funds or the requirements of legislative or other mandates.

The President will make these recommendations to the Board of Trustees based on the college's educational mission, the need for maintaining program integrity, the need for financial viability, and the responsiveness of the college to the needs of the college community.
