

Barton Community College

Pharmacy Technician Program

Pharmacy Advisory Board

A Year In Review 2019

Pharmacy Technician Program

"All of our dreams can come true...if we have the courage to pursue them." -Walt Disney

Pharmacy Technician Program

- As we enter 2020...let's take a moment to look back at 2019 and review the progress & achievements of the Pharmacy Technician Program!

Spring 2019

Walgreens Partnership

- In Spring 2019 the Pharmacy Technician Program finalized its agreement and entered into a partnership with Walgreens! This partnership has enabled our students all over the United States to have access to roughly 9,560 pharmacies in all 50 states! We now have partnerships with two of the largest retail chains... Walgreens & CVS.

Pharmacy Technician Certification Board

- The Pharmacy Technician Certification Board announced changes for eligibility requirements for the certification exam. These requirements take effect 2020. Our Pharmacy Technician Program is recognized as an official PTCB Education & Training Program. This is also listed on the Barton Website!

Pharmacy Technician Courses

Now Offered In Multiple Sessions

- Beginning spring semester of last year, the pharmacy technician program began offering mini courses. We offer two of our popular courses in session #1. We have had consistent enrollment in these courses.

Fall 2019 Semester

Hutchinson Community College

Hutchinson Suspends Pharmacy Technician Program

- Hutchinson Community College announced the suspension of their pharmacy technician program. We have created a partnership that will allow their students to transfer over to Barton to complete their studies.

Open Educational Resources & Pharmacy Technician Courses

OER Course Conversion

- What is OER? OER is short for open educational resources. This is information that is freely accessible, openly licensed text, media, and other digital assets that are useful for teaching, learning and assessment as well. These courses are of tremendous benefit because of the reduced costs. Textbooks & required materials are \$50 or less.

What's On Your Mind?

- As we begin a new year...what are some things that you would like to see happen with the pharmacy technician program?

Conclusion

We appreciate you!

Spring 2020
Advisory Board Meeting
will be announced soon!
